

ThinClientV2™

Stream any movie, song, & more at any time, on any TV!

Easily hides behind
any HDTV for a
clean, sleek look

- Browse Blu-ray and DVD movies, plus music by cover art
- Provides one unique AV stream from any Vidabox Server or Media Center
- Play archived CDs on demand
- Watch your recorded TV shows easily
- Create and view animated slideshows
- Stream Netflix and other Internet video sources
- Ultra-compact design fits in any room or setup

At only 1.5" (38mm) thin, ThinClientV2 is the most compact VidaBox Blu-ray & DVD extender, perfect for fitting into any location. With a VidaBox server in your setup, connect this to your HDTV to turn it into an entertainment powerhouse!

Don't let its small size fool you! This featherweight extender still packs a punch, with full support for visually stunning 1080p and 5.1 surround sound! It plays any movie, music, photo, and other content stored on your VidaBox server – all just a click away. Best of all, it also supports streaming from online sources like Netflix, providing the best blend between disc-based and internet content.
