

# vAutomation 2.0 for LiivController™

Total Control Over Any Equipment from Any iPad

Turn any iPad into a Remote That Replaces All Others

## With a single interface, control and enjoy:

- Equipment auto-configuration: select your source, and the HDTV, receiver, and other equipment will set themselves up - automatically
- Music: Select and play your favorite songs in any room
- Cable/Satellite/FIOS TV: Control your DVR directly, and start channel surfing
- Blu-ray/DVD players, or any set-top box: Replace any remote and enjoy complete control
- Movies: Quickly browse and launch Blu-rays and DVDs by cover art\*
- Security / Web Cameras: Check the door, or see what's going on when away from home
- Lighting, Thermostats, More: Includes advanced IP/232 controls for lighting scenes & basic energy management

vAutomation 2.0™ is VidaBox's custom, proprietary software platform that runs exclusively on the LiivController™ audio server and controller.

Included together with every LiivController, vAutomation 2.0 turns any iPad®, iPod®, or iPhone® into an ultra-powerful, yet easy-to-use touch screen remote control.

Simply access LiivController's vAutomation Web app over Wi-Fi, and take total control of any device - from cable, FIOS, or satellite TV boxes, to VidaBox servers and multiroom audio systems, or even security cameras and lighting systems – all via IR, TCP/IP, and RS-232 commands sent from the LiivController.
