## Important Note

⚠ For best results, use VidaMount VESA brackets (from VidaBox) for this enclosure. It has been specifically fitted to work with this item.

Other VESA mounting hardware can only be used after carefully checking the VESA mount screw length (Step F). Too long a screw will crush and damage the Tablet!

(F) Check VESA screw length (On non-VidaBox VESA Mounts)

With the VESA screws installed, look on the inside of the back plate.

Check to make sure that the screw lengths DO NOT PROTRUDE beyond 1/16" from the back plate surface. See diagrams below.
1/16" Height / Offset
Back Plate surface

✖ NO GOOD

Installed screws PROTUDE BEYOND 1/16" from back plate surface

New, shorter screws will be needed. Using these screws WILL DAMAGE the tablet when enclosure is fully assembled!

1/16" Height / Offset
Back Plate surface

✓ GOOD

Installed screws are LESS THAN 1/16" from back plate surface

Proceed to Step G ONLY after the screw length is confirmed "Good."

(G) Reassemble the Enclosure

Reinstall the screws removed in Step A.

Be sure the Micro-USB cable can be routed out of the enclosure. If not, go back to Step C and cut the grooves needed.

Micro-USB/
Power Cable

The Tablet is now securely installed in the enclosure!
INSTALLATION GUIDE
VidaMount VESA Tablet Enclosure
For Samsung Galaxy Tab A 7.0 Tablets

VB_VESA_GTA070

Designed to securely enclose Galaxy Tab A 7.0 tablets
Fits Galaxy Tab A 7.0 tablets ONLY

Installation Instructions
## VidaMount VESA Tablet Enclosure - Tab A 7.0

Important Note

For best results, use VidaMount VESA brackets (from VidaBox) for this enclosure. It has been specifically fitted to work with this item.

Other VESA mounting hardware can only be used after carefully checking the VESA mount screw length (Step F). Too long a screw will crush and damage the Tablet!
Component Checklist

Tablet Resin Enclosure
(Already assembled)

TOOLS YOU'LL NEED (not included)
Phillips head
Screwdriver

Knife / Box Cutter
(OPTIONAL)

A   Disassembling the Enclosure

Remove the flat-head screws as shown. Set aside the loose hardware carefully.

We will need this hardware again ater.

We now have (2) pieces:
A. The front face plate
B. The back plate

Tablet Resin Enclosure
REAR VIEW

<u>IMPORTANT</u>: Diagrams are generalized. Your exact enclosure may appear slightly different!

A. FRONT FACE PLATE

GT A 7.0

B. BACK PLATE

B   Optional : Remove Power Button Knockout (If needed)

OPTIONAL : Remove only if access to the power button is always required.

Using the blunt end of the screwdriver, press down on the circular knockout, as shown.

This will pop out the power button access panel.

### C   Optional : Cut Wiring Grooves (If needed)

OPTIONAL : Remove only if necessary.

If using a VESA mount where the center wiring hole is blocked, use a knife / box cutter, and cut out the grooves.

This will allow the tablet's wires to be routed properly.

Grooves can be cut
Center wiring hole

D   Install the Tablet into Front Face Plate

Orient the tablet properly and install it into the front face plate as shown.

Be sure that the power button, headphone out, and USB cable ports line up properly.

Connect the USB cable now. It will need to be routed through the center hole in the next steps.
