## Important Note

⚠ For best results, use VidaMount VESA brackets (from VidaBox) for this enclosure. It has been specifically fitted to work with this item.

Other VESA mounting hardware can only be used after carefully checking the VESA mount screw length (Step F). Too long a screw will crush and damage the iPad!

Ⓕ Check VESA screw length (On non-VidaBox VESA Mounts)

With the VESA screws installed, look on the inside of the back plate.

Check to make sure that the screw lengths DO NOT PROTRUDE beyond 1/16" from the back plate surface. See diagrams below.
1/16" Height / Offset
Back Plate surface

✖ NO GOOD

Installed screws PROTUDE BEYOND 1/16" from back plate surface

New, shorter screws will be needed. Using these screws WILL DAMAGE the iPad when enclosure is fully assembled!

1/16" Height / Offset
Back Plate surface

✓ GOOD

Installed screws are LESS THAN 1/16" from back plate surface

Proceed to Step G ONLY after the screw length is confirmed "Good."

Ⓖ Reassemble the Enclosure

Reinstall the (8) screws removed in Step A.

Be sure the iPad cable can be routed out of the enclosure. If not, go back to Step C and cut the grooves needed.

iPad USB-C Cable

The iPad is now securely installed in the enclosure!

INSTALLATION GUIDE
VidaMount VESA Tablet Enclosure
For iPad Pro 11-inch Tablets

VB_VESA_IPRO110

Designed to securely enclose iPad Pro 11-inch tablets
Fits iPad Pro 11-inch tablets ONLY

(iPad is shown for illustrative purposes & not included)

Installation Instructions

## VidaMount VESA Tablet Enclosure - iPad Pro 11"

Important Note

⚠ For best results, use VidaMount VESA brackets (from VidaBox) for this enclosure. It has been specifically fitted to work with this item.

Other VESA mounting hardware can only be used after carefully checking the VESA mount screw length (Step F). Too long a screw will crush and damage the iPad!
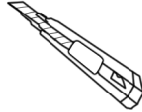

Component Checklist

iPad Resin Enclosure
(Already assembled)

TOOLS YOU'LL NEED (not included)
Phillips head
Screwdriver

Knife / Box Cutter
(OPTIONAL)

A   Disassembling the Enclosure

Remove the flat-head screws as shown. Set aside the loose hardware carefully.

We will need this hardware again ater.

We now have (2) pieces:
A. The front face plate
B. The back plate

iPad Resin Enclosure
REAR VIEW

<u>IMPORTANT</u>: Diagrams are generalized for iPads - your exact enclosure may appear slightly different!

A. FRONT FACE PLATE

IPAD PRO 11.0

B. BACK PLATE

B   Optional : Remove Power Button Knockout (If needed)

OPTIONAL : Remove only if access to the power button is always required.

Using the blunt end of the screwdriver, press down on the circular knockout, as shown.
This will pop out the power button access panel.

C   Optional : Cut Wiring Grooves (If needed)

OPTIONAL : Remove only if necessary.

If using a VESA mount where the center wiring hole is blocked, use a knife / box cutter, and cut out the grooves.

This will allow the tablet's wires to be routed properly.

Grooves can be cut

Center wiring hole

D   Install iPad into Front Face Plate

Orient the iPad properly and install it into the front face plate as shown.

Be sure that the power button, volume buttons, and USB-C cable ports line up properly.

iPad Cable

Connect the iPad cable now. It will need to be routed through the center hole in the next steps.
